HEALTH AND SAFETY AND TECHNICAL INFORMATION

B36 PASTE POWDER

- Product Description:** Pre-Gelatinised starch refined from regular Maize.
- Appearance:** Fine White Powder
- Applications:** B36 is a pre-gelatinised starch based on regular maize. It can be used in food processing and in adhesive applications.
- Preparation:** Whilst stirring, add powder to water until required consistency is reached.
- Packaging:** 300g, 1.5kg and 25kg containers
- Storage and Handling:** Store in a clean, dry, well ventilated warehouse at ambient temperature and away from odorous materials. Ideal storage conditions are 20-25°C and <65% relative humidity. Handle sensibly to minimise the formation of dust and the build up of static electricity.
- Shelf Life:** 24 months from date of manufacture
- EC Classification:** Not regarded as hazardous.

FIRST AID TREATMENT

- Inhalation:** This product can produce a nuisance dust, which should be maintained below a time weighted average of 10mg/m³. Remove from over exposure.
- Ingestion:** None required.
- Skin Contact:** Low order of toxicity. Wash with soap and water.
- Eye Contact:** Particulates may scratch eye surfaces and cause mechanical irritation. Remove by irrigating with warm water. If symptoms develop, see medical advice.
- Fire Fighting:** CO₂, Dry Chemical, foam or water fog.
- Spillage:** Normal precautions for 'nuisance dust' should be observed. Avoid prolonged inhalation of dust. Sweep or vacuum up and place in suitable container for disposal. Prohibit smoking or open flame. Avoid sparks or other sources of static electricity.
