HEALTH AND SAFETY AND TECHNICAL INFORMATION

DRAFT CLEAN PADS AND POWDER

Description A vegetable oil fibre (soybean oil), ground into a mildly yellow coloured powder, mixed with 5% or less of talcum powder and packaged in drums or pads. There is no rubber in this product but there is a slight amount of sulphur present.

Safety Due to the fine particle size, care should be taken during application on the basis of handling a fine dust. Otherwise harmless.

We would draw your attention to the need for adequate exhaust ventilation in areas where this product is used, as draft clean pads will be covered by the general requirement to minimise exposure to dust. As there is no specific exposure limit for draft clean powder, personal exposure should be to a minimum.

NB: The information supplied is, to the best of knowledge, true and accurate, but recommendations or suggestions made are without guarantee since the conditions of use are beyond our control.
