PVA M289

Our PVA M289, replaces both the previous M155 and M218 products. This new PVA is a general all-purpose bookbinding and leathersgoods PVA adhesive and is suitable for use on leather, cloth, paper, board and wood. It may be used for a variety of packaging, bookbinding and leathercraft applications either by machine or by hand and is particularly suited for use on Swift, Balema or Nubal machines for hand case making. It is also suitable for Conservation Work as the dried adhesive film delaminates in the presence of water. However, as conservation methods can be varied and needs differ, we recommend that the customer test this product against their specific conservation requirements.

Estimated shelf life: 6 months. - To reduce the risk of contamination and mold growth, we recommend using a clean spoon or ladle to transfer only the amount of PVA you need, then promptly resealing the main container.

First Aid and Handling

Inhalation

If spray/mist has been inhaled, proceed as follows. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing.

Ingestion

Rinse mouth thoroughly with water. Give plenty of water to drink. Keep affected person under observation. Get medical attention if any discomfort continues.

Skin Contact

Remove contaminated clothing immediately and wash skin with soap and water.

Eye Contact

Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get medical attention if irritation persists after washing.
